

Fine Art Miracles

2024 Impact Report

WHO WE ARE

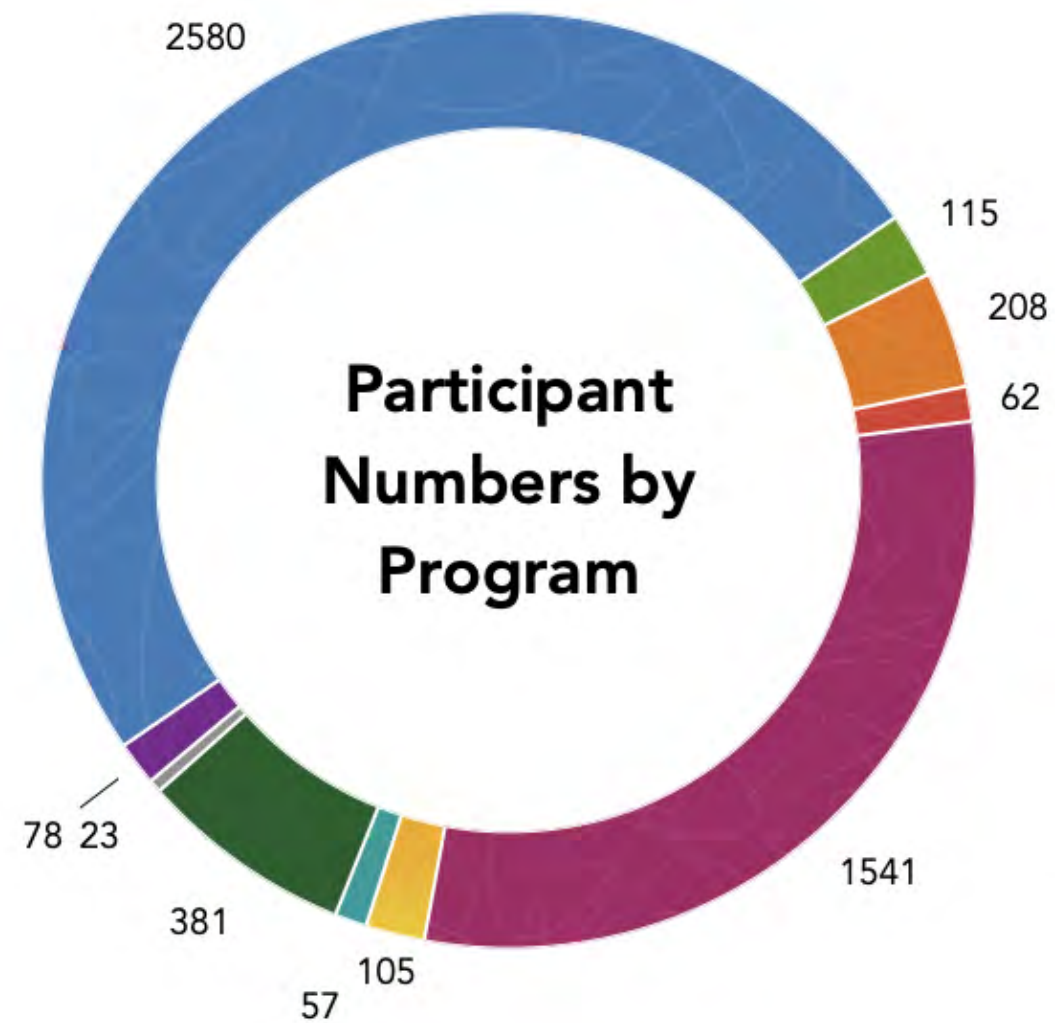

Fine Art Miracles, Inc. (FAM) is dedicated to supporting the most vulnerable members of our communities by offering creative therapies and innovative solutions. Through programs like fine art instruction, music, dance and movement, drumming, drama therapies, and social robotics, FAM brings transformative experiences to those in need. Highlights include FAMbot Learning for children, Multi-Sensory Sessions for individuals with Alzheimer's and their caregivers, and pioneering Pilot Programs that leverage new technology to combat the challenges of social isolation. Headquartered in Pittsburgh, FAM serves communities across western Pennsylvania and western New York, staying committed to its mission of social responsibility.

- Part-time Administrative Staff
- Teachers/Therapists
- Ongoing Volunteer

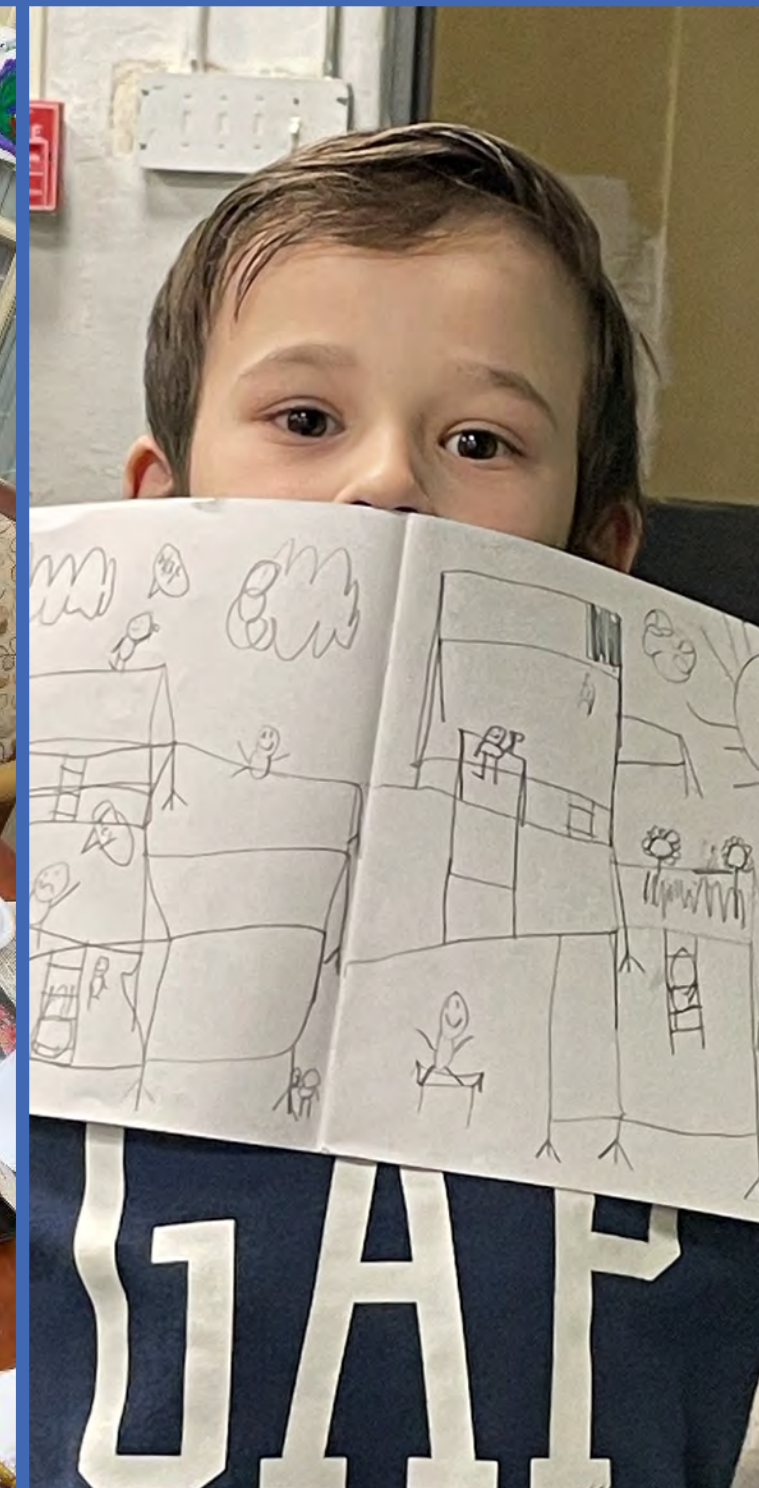

ART CLASS/ ART THERAPY

Art Therapy has proven to be a valuable tool for sparking interest and offering a simple, nonverbal way to express emotions. This approach is particularly effective for younger children, older adults, and individuals on the autism spectrum, who may find verbal communication challenging or uncomfortable. At FAM, we provide Art Therapy sessions with a Certified Art Therapist, available both in-person and virtually. Additionally, engaging in art classes activates the temporal lobe of the brain—a region that often stays functional longer in individuals with Alzheimer's or dementia. Through the use of color and imagery, artistic expression offers a meaningful way for people to communicate their emotions.

BABYbots

BABYbot is a specialized tool designed to engage individuals living with Alzheimer's and other dementias in meaningful and comforting ways. By using interactive features, soothing responses, and familiar stimuli, BABYbot helps reduce agitation, anxiety, and other challenging behaviors often associated with dementia.

This gentle engagement not only promotes emotional well-being for individuals with dementia but also provides much-needed relief for caregivers by offering moments of calm and connection. BABYbot is an innovative approach to improving quality of life for both individuals with dementia and their support networks.

COMMUNITY ENGAGEMENT

Fine Art Miracles (FAM) is deeply committed to community engagement, creating inclusive programs that bring the joy of art to people of all ages and abilities. Through workshops, events, and outreach initiatives, FAM fosters creativity, connection, and self-expression in underserved and underrepresented populations. Their programs empower individuals to explore their artistic potential while building meaningful relationships within their communities. By providing accessible and tailored art experiences, FAM nurtures a sense of belonging and inspires positive change, proving that art has the power to unite and transform lives.
